HOME CARE

So intuitive to collect data
So effective to share information

FORM@DOM WINS OVER THE HOME CARE SECTOR

BIEN ÊTRE À LA MAISON

This non-profit association, created in March 2005 by Bruno Picard, is dedicated to **home care for dependent persons**. The organization comprises roughly **60 home care aides**, for 75 to 80 recipients. They are in charge of ensuring their daily physical and emotional wellbeing, playing a **fundamental role** in the lives of

these people.

Background: To support its development and offer optimized services to its recipients, **the association was looking for a solution that would allow it to quickly obtain information on the activity of the home care aides**. The goal is to share the information with all medical / social work professionals and with distant families. The Kayentis solution met the challenge and was hailed unanimously. The recipients and their families have fully bought into the concept.

Solution: Using the Digital Pen & Paper technology, **the Kayentis solution was tailored to the specific needs of Home Care. The result is FORM@DOM**. Thirty-five home care aides are equipped with a Bluetooth kit (digital pen and cell phone), making it quick and easy for them to fill in their patterned time sheets and care report books. The information can then be consulted easily.

KAYENTIS is the #1 publisher and operator of digital pen and smart paper solutions for the healthcare industry.

These solutions, based on the KAYENTIS Digital Pen & Paper platform, combine the best of the physical and digital worlds: a very simple collection method (paper and pen) that offers the highest data reliability, plus all the advantages of electronic management (real-time data access, precise timestamping, audit trail features, alerts, and transmission of relevant information to each stakeholder).

Today, KAYENTIS solutions have been successfully deployed in **50 countries for more than 50,000 patients**.

KAYENTIS is a member of the MEDICEN, Lyon Biopôle, Pennsylvania BIO and BIO New Jersey clusters. KAYENTIS is an Anoto Platinum Partner, Oracle Partner and HP Solution Business Partner.

HOME CARE

TESTIMONIAL

Bruno Picard

Founder and Manager of the association BIEN ÊTRE À LA MAISON

“ I was won over by the Kayentis solution, which allows me to equip home care aides with an intuitive and user-friendly system, that **doesn't interfere in their relationship with the recipient**. The solution allows **real-time information sharing** between medical and social work professionals. It's a key factor in maximizing recipient monitoring, therefore improving the quality of their lives. ”

KAYENTIS, a developer of professional digital writing solutions, innovates a bit more each day, delivering products and services that are tailored to the needs of its customers. Already well established in the clinical research market through laboratories and research groups, the company is catching the attention of fast-growing sectors such as home care. BIEN ÊTRE À LA MAISON, a non-profit association that acquired the Kayentis solution, is one example. It was a revelation!

BIEN ÊTRE À LA MAISON and others have been won over by the many benefits offered by the Kayentis solution.

FORM@DOM: simple and easy to use

One of its many advantages is unquestionably its **ease of use**. After completing the digital notebook (consisting of a care report book and patterned time sheets), the home care aides send out the data **in real time** from their cell phone. A very intuitive approach!

Share and exchange data in real time

Using the Web portal made available to it, BIEN ÊTRE À LA MAISON can easily access the information transmitted by the home care aides. One of the main benefits of the Kayentis solution is that it allows **information sharing and exchange**. With the recipient's consent, the association can share the information with **caregivers** (primary care physicians, nurses, etc.) and the **family**. As Bruno Picard points out, "sharing information between all medical / social

work professionals is crucial to ensure **optimized monitoring of recipients, thus improving the quality of their lives.**"

A reliable solution

In addition to its ease of use, the Kayentis solution is also reliable. Data recorded by home care aides that seems unreliable is discarded. **This avoids all bias in the interpretation of the results.**

High data precision

With this feature, which specifies who wrote what on which document and when, **home care aide management and scheduling have been improved**. Now, requests for leaves are acknowledged as soon as they are recorded. BIEN ÊTRE À LA MAISON is never caught off guard, and can schedule a replacement in case of an absence. Personnel arrival and departure times are also recorded. Depending on the time spent with the recipient, the association can make adjustments.

Timestamping allows the association to **anticipate needs** and avoids unforeseen events.

Confidentiality guaranteed

Because information is precious, special care is paid to its transmission. And to ensure its confidentiality, one of the means of **protection** provided by Kayentis is a **secure Web portal**.

These advantages, combined with an excellent understanding of the customer's requirements and needs, ensures that the **demand finds a suitable response. The benefits are felt right down to the way the association is organized.**

In fact, since it adopted the Kayentis solution, the way BIEN ÊTRE À LA MAISON operates has changed and become more organized.

With the Kayentis solution, time is saved and your workload is streamlined

By creating administrative tools (care report book, time sheets, etc.), the association saves time managing its personnel. Before, to prepare the pay slips, the home care aides handed in their time sheets at the end of the month. This represented one week of work for the association. Today, **the real-time recording and transmission of this information significantly reduces the workload**: "our administrative management is considerably simplified, enabling **time savings of more than 30%**", confirms Bruno Picard.

For BIEN ÊTRE À LA MAISON, the adventure is not over! The potential of Kayentis' solution is such that other functions can be imagined, as Bruno Picard points out: "the scalability of the Kayentis solution allows us to consider new features, in particular regarding monitoring the work schedule of our home care aides, that will play a key role in helping us achieve our quality objective: AFNOR certification".
